

CURRICULUM VITAE

I have experience in the customer service and music industry, however, I have always been passionate about programming and development, and possess a keen eye for detail and a natural aptitude for problem-solving. I completed a coding Traineeship as a full stack developer, successfully delivering two real-world projects to specification using a variety of programming languages. In addition to my training, I have also worked as software developer, working with customers to design and build systems up to their specifications, and have overseen several projects from start to end during my time in the industry. Alongside my strong communication, teamwork, and organisational skills, I have a tireless work ethic, and I am eager to expand my career further in the software development field and demonstrate myself as a valuable asset.

Technologies:

- HTML5, CSS3, JavaScript, PHP, SQL, Kotlin, C#, Java, Python
- React, Node.js, Express.js, jQuery, Laravel, PostgreSQL, MySQL
- Command Line Git, GitHub
- Remote API access
-

Work Experience:

As a software developer for Cairn Solutions, I have a proven track record of working with customers to understand their needs and design systems that meet their requirements. I am highly skilled in all aspects of managing a project, from communicating with customers and designing a system to building, testing, and deploying the final product. I possess strong attention to detail and a natural aptitude for problem-solving, allowing me to effectively update and fix bugs on existing projects as well. Furthermore, I am experienced in working on several projects simultaneously, ensuring timely and efficient delivery of high-quality solutions. Throughout my career, I have developed a skill set that enables me to do my job efficiently and work under high pressure situations.

Traineeship Experience:

Portfolio Project #1: "Gazetteer"

Successfully delivered a map-based app that provided information on countries with a focus on mobile-first development, using a framework to develop HTML, CSS, and JavaScript with JQuery modules that utilised PHP server-based components to source data from third-party APIs (Geonames, OpenWeather). The solution was assessed on its delivery to specification, functionality, and usability.

Portfolio Project #2: "Company Directory"

Successfully delivered a mobile-first application to maintain a company personnel database (MySQL). Sign-off was only achieved upon submission of an independently witnessed document confirming the system's ability to perform error-free. Demonstrated exceptional attention to detail and a thorough understanding of project management principles throughout the development process.

CAREER HISTORY:

June 2023 – Present

POSITION HELD:

Architextures

Junior Software Developer

- Full Stack Development
- Continuing the development of our core product
- Maintenance of legacy code
- Adding new features

May 2020 – September 2022
